

The GUI:

The purpose of this application:

This application is made to define English words in Chinese.

The idea is that sometimes as a teacher I would like to provide phonetics to an English word in slides but it was frustrating to search and copy and paste. So, here is the solution to the problem.

MiniDefiner aims to facilitate the process of coping and pasting the definition of an English word from online dictionaries. All you need to do is to copy an English word and paste its Chinese definition!

How to use it?

This app requires internet connection.

You simply need to click on the button "Do it" and go copy an English word and paste its definition.

If you want to paste only phonetics please select the first radio button.

If you want to paste the definition of the first part of speech please select the second radio button.

If you want to paste the whole definition please select the last radio button.

Suggestions:

You are strongly suggested to copy and paste a word using key combinations on your keyboard.

Key combination for coping: Ctrl+C

Key combination for pasting:Ctrl+V
